### ➔ Orovo Juice

The revolutionary idea behind Orovox is our unique combination of three Health Optimizing Blends. This superior formula began by utilizing our signature Top 10 SuperFoods, a tried and true combination that makes it the strongest, most enriched formula on the market. But, we didn't stop there. By adding four SuperAntioxidants and 12 SuperFruits, we've formulated the only super-juice blend that contains all the vitamins and nutrients that your body needs.

### ➔ What Makes Orovox Juice Superior

>> **ANTIOXIDANTS** are substances known for their ability to counteract the oxidation process in the body. In some areas, the oxidizing process creates electrically charged molecules called "free radicals" that can interact with other parts of our cells, damaging DNA and proteins in our cells.

>> **PHYTONUTRIENTS** are natural plant nutrients which are important for health and may promote healthy immune system function.

>> **ESSENTIAL FATTY ACIDS** (omega 3,6 and 9) are known as "Good Fats", required in the human diet but must be obtained from food since our body has no way of producing them internally. EFAs support the cardiovascular, reproductive, immune, and nervous systems.

>> **AMINO ACIDS** play central roles both as building blocks of proteins and as intermediates in metabolism.

>> **DIETARY FIBER** is important for maintaining digestive system health. Low-fat diets rich in fiber-containing grain products, fruits, and vegetables may promote cardiovascular health.
